EDUCATION

Georgia Institute of Technology

B.S. in Industrial and Product Design
Minor in Computer Science
May '21

CERTIFICATIONS

Bentley University

UX 980 C
The Experience Design Process
Apr '25

UX 935 C
Designing the User Experience
Mar '25

LUMA Institute

Facilitator of Human-Centered Design
Jan '23

Practitioner of Human-Centered Design
Sep '22

SKILLS

Design & UX Methods

User-centered design, interaction design, interface prototyping, wireframing, user flows, information architecture, visual storytelling, responsive UI design, design systems, design documentation

Research

User interviews, usability testing, contextual inquiry, task analysis, affinity mapping, journey mapping, interface audit

Tools / Software

Figma, Sketch, InVision, Adobe XD, Adobe Creative Suite, Power BI, Autodesk Fusion, Solidworks, Google SketchUp, Autodesk Maya, Autodesk VRED, Microsoft Suite

Coding

HTML5, CSS3, Github, JavaScript, D3.js, Java, Android Studio

EXPERIENCE

Autodesk | Learning Experience Designer Jul '21 - Present

- Led UX and UI design for our internal sales enablement apps used by sales teams of 800+ individuals, collaborating with cross-functional teams in the end-to-end design process, increasing app usage by 288%
- Redesigned home-page and navigation experience for myAgro's mobile app as UX designer via Autodesk Pro Bono in collaboration with UX research, product and engineering team
- Delivered high-fidelity prototypes, user personas, journey maps, and revised information architecture, and facilitated remote usability testing sessions with end users
- Conducted 1-on-1 user interviews and focus groups with stakeholders from construction and manufacturing, and translating findings into design requirements
- Synthesized research findings and user insights into slide decks and walkthrough presentations, addressing stakeholder goals while championing user needs throughout the design process

Bioma | Freelance UX Designer Dec '22 - Jan '23

- Redesigned Bioma's landing page to accommodate multiple user personas and task flows, resulting in 50% traffic and conversion growth
- Delivered detailed handoff packages with specs for responsive layouts, reusable components, and interaction patterns, enabling smooth developer implementation across 50+ pages.

Listee | UX Designer, Part-time Nov '20 - Jun '21

- Redesigned and shipped external site and merchant dashboard experience, on mobile and web, significantly increasing the number of active users as well as site conversion rate by 73% over the older design
- Collaborated with scrum teams to map user needs and pain points at every touchpoint, from product discovery to daily customer interactions, and used this data to iterate on high-fidelity prototypes
- Created Listee's design system by aligning UI patterns with user behavior, incorporating Listee's brand, and working with developers to consider technical constraints, cutting map load API call by 75% despite overall usage increasing

OneTrust | UX Design Intern Jun '20 - Aug '20

- Redesigned asset map concept to visualize country-specific data transfer risk and improved interoperability of modules by enabling an extended list of actions to be done conveniently within the asset map
- Conducted market research, user interviews, and usability testing, presented in high-fidelity mockups using Sketch
- Designed OneTrust's email template builder experience to replace the HTML editor, from high-level wireframes to final design specifications
